

Insulated Rail Measuring Wheel - Dual Reading

PRODUCT DESCRIPTION

Developed in collaboration with Network Rail, VGC Rail Projects, Avancer (UK) and Jafco Tools Limited, the insulated rail measuring wheel is purposely designed to provide protection to the operator when working near to live conductor rails when measuring lengths of rail sections/overall distances. The unit is dual scaled, enabling measurements to be made both in metres and yards.

	0094/007203	Insulated rail measuring wheel - dual reading Range up to 99,999.9 metres/yards

SPECIFICATION

- Insulated in accordance to BS8020:2011
- Dual reading metric/ imperial
- Range: 99,999.9 metres/yards
- Increments 0.1 metre/0.1 yard
- Accuracy +/- 0.5%
- Adds when pushed forwards/subtracts when reversed
- Wheel circumference: 0.5 metres
- Wheel diameter: 0.16 metres
- Weight: 4.40Kgs
- Dimensions: 1004mm (H) x 192mm (L) x 170mm (W)
- Supplied with heavy duty canvas storage bag
