

Punch and Guide for Fixed Type Stretcher Bar Installation

PRODUCT DESCRIPTION

Used for marking the stretcher bar mounting bracket hole position when installing fixed type stretcher bars. Recently updated for use with both new 'yellow' and old 'black' type fixed stretcher bars. The punch guide is inserted into the mounting bracket hole ensuring that the punch, when struck with a hammer, marks the hole centre position.

SPECIFICATION

- Revised guide outer diameter of 20.3mm enables use on both new 'yellow' and old 'black' type fixed stretcher bars.
- Zinc and gold passivate finish of the guide ensures that the new revised type is easily distinguishable from the previous version.
