

Mould Alignment Gauge Set

PRODUCT DESCRIPTION

Designed to assist welding engineers to centralise and vertically set Thermit moulds and therefore reduces weld failures attributed to incorrectly positioned moulds.

Thumbnail	Part Number	Network Rail Reference	Description
	LT/RG/41	URLT/002716	Mould alignment gauge set for the Thermit SkV-E process
	LT/RG/42	N/A	Mould alignment gauge set for the Thermit SkV-F process

SPECIFICATION

The minimum and maximum lines help to centralise the gauge and also confirm that the gap between the rails is within tolerance.

Two sets are available:

LT/RG/41: Used for the Thermit SkV-E processes

LT/RG/42: Used for the Thermit SkV-F processes

Each set comprises: Head gauge, foot gauge and are supplied in protective leather wallet
